

ELECTRICITY TARIFFS FOR PROFESSIONAL CUSTOMERS WITH A LOW-VOLTAGE (BT) CONNECTION FOR 2025

The price of energy is composed of two elements:

1	Consumed energy provided by a production installation whose electricity is bought back by Energy Revolt: 60% of consumed volume guaranteed	0,15	€/ kWh	Guaranteed price for 36 months
2	Consumed energy that is not provided by a production installation whose electricity is bought back by Energy Revolt:	0,165	€/ kWh	Guaranteed price for 12 months

Additional costs

Other payment than direct debit :	3	€/ month
Invoices sent by other means than e-mail :	3	€/ month

Not included:

- network usage costs*
- metering costs*
- contribution to the compensation mechanism**
- electricity tax***
- value added tax (VAT)

Upon written request by the customer when subscribing, Energy Revolt provides the customer with a **monthly billing comparison** for the **first 2 months** of supply between **component 2** and the hourly Day-Ahead market prices, to which an additional charge per kWh is added. On the basis of these two comparisons, the customer may decide to **replace the component 2 price with a dynamic price** based on hourly market prices + charges. This replacement can only begin **from the 4th month** of supply.

The electricity is certified with the Ekoenergy label, a global, non-profit eco-label for renewable energies.

*The tariffs for the use of the network are accepted by a decision of the Institut Luxembourgeois de Régulation (ILR) and approved by ministerial decree. Network charges are invoiced by Energy Revolt s.c. and reimbursed to the entitled parties. Energy Revolt s.c. may pass on to end users any variation, even retroactive, in the network usage tariffs.

**The compensation fund is a contribution to encourage the production of national electricity based on renewable energy sources or cogeneration. It is managed by the Institut Luxembourgeois de Régulation (ILR), which sets the amount of this contribution each year.

***The electricity tax is collected by all suppliers on behalf of the State, the amount being set annually by the budget law.

Product subject to availability, Energy Revolt reserves itself the right to refuse any new contract in particular in case of energy coming from a production installation insufficient to cover the required 60%.
